REVIEW COMMITTEE MEETING FOR REG. 1124 SECTIONS 26, 27 AND 36, VAPOR EMISSION CONTROLS AT GASOLINE DISPENSING FACILITIES (GDFS) - The Department is planning to revise Regulation 1124 (i.e., 7 DE Admin Code 1124) Sections 26, 27 and 36, which deals with gasoline vapor emissions at gasoline dispensing facilities (GDFs) in Delaware. DAQ has organized a review committee, with members from the regulated community and the public, to assist in this rule-making

process. Meeting to take place at DNREC (Conference Room B), Lukens Drive, at 9:30 AM on **December 19**. For additional information, please contact Frank Gao at (302)-323-4542; or visit: <http://egov.delaware.gov/pmc/Event/Details/22815>,

Tier II Reporting; Upcoming Changes and Notice of Workshops-Delaware's EPCRA Reporting Program will be implementing a new version of their online reporting system, TIER II MANAGER™ in January 2014. While the system screens will have a new look and feel, the overall reporting process using the system will be similar to previous years. Step-by-step instructions for reporting within the system will be made available for downloading at (<http://www.dnrec.delaware.gov/SERC/Services/Pages/DownloadFormsorSoftware.aspx>) during the first week of January 2014.

In addition, the U.S. Environmental Protection Agency (EPA) has made changes to the Tier II reporting requirements by adding several data elements and modifying several existing items. A fact sheet providing an overview of the EPA required changes is located at http://www2.epa.gov/sites/production/files/2013-08/documents/epcra_amendments_fact_sheet-2.pdf. These changes are effective January 1, 2014, which will include the upcoming 2013 reports. The new version of Delaware's online TIER II MANAGER™ system mentioned above will incorporate the EPA modifications, and reports submitted on-line using the new system will comply with the EPA changes.

Training Workshops

A series of free workshops are scheduled to demonstrate the new TIER II MANAGER™ online reporting system, discuss the new data elements added by the U.S. EPA, and review the chemical inventory reporting requirements in general. The workshops will be half-day sessions (3 to 3½ hours), and registration is required. Morning sessions will begin at 9:00am, and afternoon sessions will begin at 1:00pm. Workshop dates/locations are as follows:

SITE INVESTIGATION AND RESTORATION SECTION – The Division’s Site Investigation and Restoration Section (SIRS) is responsible for the identification, evaluation and remediation of sites in Delaware that have had past releases of hazardous substances. The Section manages the contaminated sites under three major programs in accordance with the Hazardous Substance Cleanup Act (HSCA). The three programs are the Brownfields Development Program, the Voluntary Cleanup Program (VCP) and the HSCA Enforcement Program (for sites requiring enforcement action).

The Brownfields Development Program encourages the cleanup and redevelopment of vacant, abandoned or underutilized properties, which may be contaminated. A party seeking to develop such a property negotiates with SIRS for a Brownfields Development Agreement (BDA) to perform an investigation and, if necessary, a remedial action or remedy, for the purpose of addressing the risks posed by past releases of hazardous substances at these sites. However, a BDA is only available to parties that are not current site owners. The Voluntary Cleanup Program (VCP) Agreement is available to site owners, who want to clean up their sites and are already liable as a potentially responsible party for the site. Proposed and final plans of remedial action are available online at: <http://www.dnrec.delaware.gov/whs/awm/SIRB/Pages/SIRBPlans.aspx> under “Announcements.” For site-specific information, please see DNREC’s Environmental Navigator at <http://www.nav.dnrec.delaware.gov/DEN3>
